

Model: GPT-4

LY

以下内容是我在代码中关于各阶段模型的描述，请将其翻译为中文，用于我的中文版 GitHub README 文件。

* ppo_ryu_2000000_steps_updated: Just beginning to overfit state, generalizable but not quite capable.

* ppo_ryu_2500000_steps_updated: Approaching the final overfitted state, cannot dominate first round but partially generalizable. High chance of beating the final stage.

* ppo_ryu_3000000_steps_updated: Near the final overfitted state, almost dominate first round but barely generalizable.

* ppo_ryu_7000000_steps_updated: Overfitted, dominates first round but not generalizable.

- ppo_ryu_2000000_steps_updated: 刚开始出现过拟合现象，具有泛化能力但不太强大。
- ppo_ryu_2500000_steps_updated: 接近最终过拟合状态，无法在第一轮中占据主导地位，但部分具有泛化能力。在最后阶段有很高的获胜机会。
- ppo_ryu_3000000_steps_updated: 接近最终过拟合状态，几乎可以在第一轮中占据主导地位，但泛化能力微弱。
- ppo_ryu_7000000_steps_updated: 过拟合，第一轮中占据主导地位，但泛化能力差。
